

MSI PROFILER

Why walk through...when you can float through..... Continuous inspections up to 3 kms.

State of the art CCTV systems

Underground Vision are industry leaders in 'large bore' pipeline investigations. Using state of the art laser, sonar and high definition CCTV profiling systems.

Benefits

- Useable in various pipelines (375 - 3000mm)
- Large diameter HD profiling (modular, no data cables)
- High resolution
- 6 hours continuous recording
- Over 4,000m line length
- Only limited by tether (rope) availability

Detailed reporting

Our detailed reporting will provide the following:

- Corrosion Levels
- Debris levels
- Pipe Integrity
- Accurate Pipe Measurements

Pipeline rehabilitation

The HD profiler systems provides information that will allow informed decisions to be made regarding pipeline rehabilitation.

Graphs and reports

- Sonar Profiling Debris Graphs
- Flat Graph
- Pipeline observation report: deformation and corrosion
